

All participants saw one practice grid and four test grids. Participants were randomly assigned to Condition A or Condition B with an equal number of children in each condition. The order of the test grids was consistent across all participants (Either 1A-4A, or 1B-4B).

CONDITION A

PRACTICE GRID

GRID 1A

GRID 2A

GRID 3A

GRID 4A

CONDITION B

PRACTICE GRID

GRID 1B

GRID 2B

GRID 3B

GRID 4B
